

The Embassy of the Republic of Mozambique would like to share the following information on measures taken and announced by the Government to prevent the infections by New Coronavirus:

- until now, no case of COVID 19 infection has been confirmed in Mozambique.
- Considering the high risk of disease transmission in different countries, the Government of Mozambique decided to raise the alert level by consolidating the measures previously disseminated and adopted new additional measures, namely:
 - To screen all visitors at points of entry into the country;
 - To institute a 14-day quarantine for asymptomatic travellers arriving from countries affected by COVID-19, regardless of their nationality that will be assessed by a health ministry team. If they develop symptoms and test positive for COVID-19, they will be required to move to a health facility;
 - To suspend the organization and participation of events with more than three hundred people;
 - To discourage the realization of events in areas without adequate ventilation.
